Innovative Technology, Minimal Cost

Save
70% Cost

Ensure accuracy and
Transparency

Guarantee
Security

Case Study

With a huge number of input and output goods, accounting work at Daikin's branches encountered many difficulties. Invoices manually imported into accounting software were not only time-consuming but also prone to errors. This created inaccurate aggregated data, which resulted in hours of accountants' reviewing & detecting the problems.

Process

40,000 invoices per year

Save

130 working days

Manual processing of 2,500 invoices per month is one of the main causes of prolonged stress and overstaffing at the Accounting department in Rang Dong. It was not until UBot was applied that their "nightmare" officially ended.

Process

2,500 invoices per month

Save

15 - 25% of costs

Accountants' expertise & performance is the most important factors determining the growth of accounting & audit companies like Expertise.

Acknowledging the enormous time & effort spent on manually scanning & reconciling invoices by the Accounting & Tax Services Department, Expertis has trusted UBot Invoice to ease the employee's workload. This in turn generates more time for accountants to improve their expertise, thereby bringing the best service quality to customers.

Save

70% of time and efforts
